ADAPTIVEFLEX CLOSURE SYSTEM

01. INNER ELASTIC BANDAGE

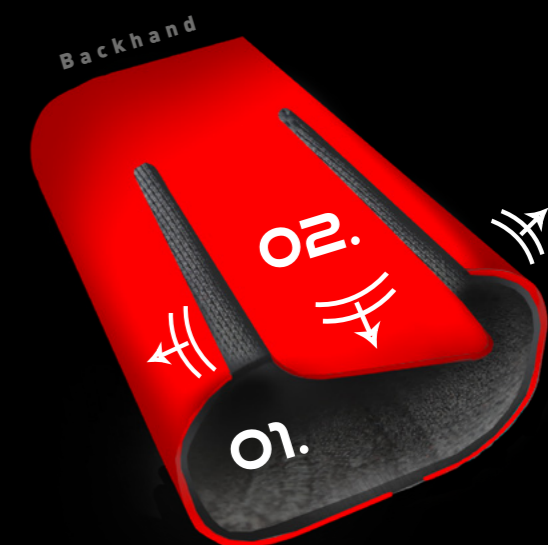

02. NEOPRENE UPPER

Moving away from the traditional cuff closure system, the new patent pending AdaptiveFlex technology provides a highly flexible and at the same time supportive and precise fit around the wrist.

Based on a two-layer construction consisting of an internal elastic bandage wrapping around the wrist and an extended neoprene backhand with strategically positioned cuts on the inner and outer side of the wrist, this innovative structure guarantees support and stability while further enhancing lightness, flexibility, and freedom of movement.

The new Reusch AdaptiveFlex closure system is available both with and without our tested strap fastening system, in order to meet every goalkeeper's taste.

REUSCH GRIP LATEX

The first-choice latex of Lloris and Szczęsny provides unmatched grip and high abrasion resistance for all weather conditions and pitch surfaces.*

ALL WEATHER & DURABILITY BOOST

3D latex dots on the inner side of this high-grip palm foam prevent from any slipping of the hand and improve the tactility for maximized ball control.*

CONTROL BOOST

Three-dimensional spikes on the surface of this professional match latex increase the friction between the glove and the ball for maximum grip and control.*

FRICTION BOOST

Trusted by Samir Handanović and many other professional keepers, this exceptional match latex guarantees maximum grip and stickiness.*

ADHESION BOOST

GLUEPRINT.

By applying a special sticky print on the palm latex, tackiness and grip get enhanced exactly in those zones where it's needed the most. The positioning of the ink follows a precise pattern that is designed to cover exactly those areas of the palm that get in most contact with the ball when catching.

This match foam provides excellent grip in dry and especially wet weather and surface conditions thanks to its unique latex composition and our exclusive Hydrograin particles.*

WET WEATHER BOOST

This high-quality latex is the perfect combination of durability and grip for professional performances on artificial grass.*

DURABILITY BOOST

This premium match foam guarantees outstanding grip and reliable durability thanks to the addition of the largest possible amount of high-quality natural latex.*

GRIP BOOST

This very soft, high-volume latex offers great grip and outstanding cushioning against hard shots.*

IMPACT ABSORPTION BOOST

Great choice for hard ground and artificial grass thanks to its compressed latex with rough surface and high abrasion resistance.

DURABILITY BOOST

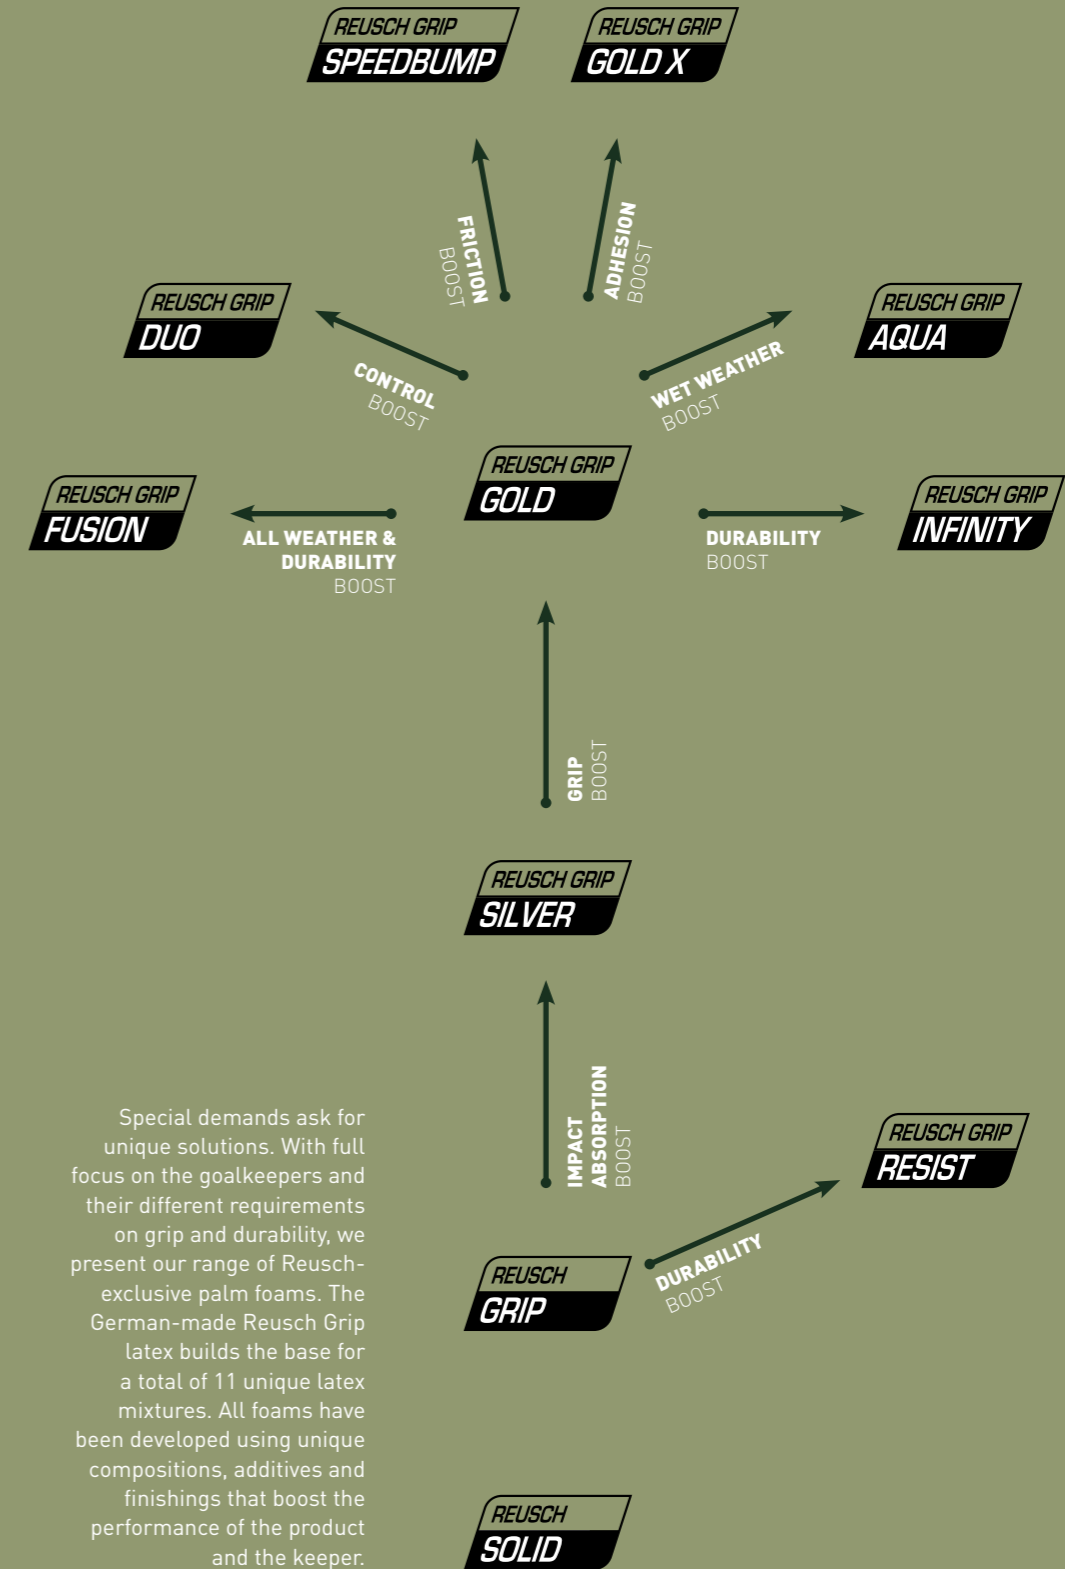

German-made palm foam that guarantees good grip and reliable durability thanks to a large proportion of high-quality natural latex.*

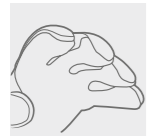

This highly durable palm foam is perfectly suited for recreational goalkeeping on all types of pitch surfaces.

* LATEX MADE IN GERMANY

CUTS:

EVOLUTION NEGATIVE CUT

The latex is rolled around the fingertips for a tight fit, best ball control and maximized contact area. An inner-seam construction in the lower finger parts offers a tight, soft, flexible and ergonomic fit.

EVOLUTION CUT

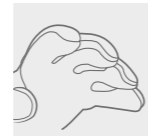

The latex is seamlessly rolled around the fingertips for a precise fit, best ball control and maximized latex-to-ball contact area. An outer-seam construction in the lower finger parts offers an ergonomic fit, breathability, softness and flexibility.

EXPANSE CUT

Outer seams enlarge the palm surface of this flat cut and so increase the latex-to-ball contact area.

HYBRID NEGATIVE CUT

Negative construction with one single gusset and wrapped latex around the index finger and the pinkie for best ball control.

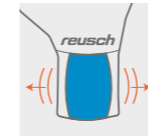

ROLL FINGER

The latex is seamlessly rolled around the fingers, providing the largest possible catching area.

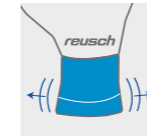

CUFF & CLOSURE:

STEADY CUFF

In order to stabilize the wrist and provide the highest possible wearing comfort, we extended the neoprene backhand all the way to the opening and merged it with a highly elastic textile on the inner wrist side.

ELASTIC CUFF

This well-proven closure based on highly elastic textile guarantees great fit and additional wrist support.

FULL STRAP

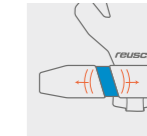

Our tried and tested fastening system all around the wrist for maximum stability and comfort.

OPEN CUFF

A vertical cut on the inner side of the cuff makes entering the glove as easy as never before.

ELASTIC STRAP

Premium strap consisting of two pieces that are connected by a highly elastic textile insert. This special material-mix guarantees a highly precise and stable fastening.

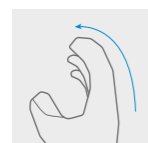

FEATURES:

FREEGEL

Extremely light and durable punching zone made of silicone-like material, resulting in a very robust and at the same time highly flexible backhand.

PRESHAPED CONSTRUCTION

The anatomical shape of the glove and the slightly spread fingers enhance the glove's wearing comfort and support a natural catching position.

DURAGUARD

This latex patch offers extra abrasion resistance and durability in the most stressed zone of the palm.

VENTILATION CHANNELS

Strategically placed small holes in the latex gussets guarantee constant ventilation and cool hands.

AIRVENTSYSTEM

Highly breathable mesh material ensures optimum air circulation within the glove, providing maximum ventilation.

PALM EMBOSSING

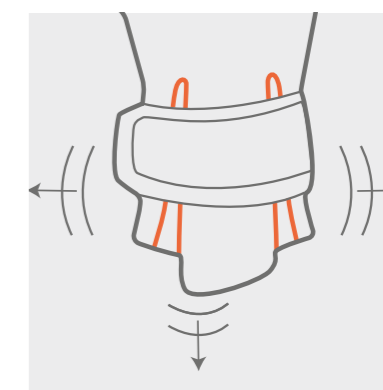

Embossments following the natural lines of the hand support the natural grasping movement.

FINGER SUPPORT

This reliable finger protection system based on five protection spines reduces the risk of hyperextension while keeping the glove soft and flexible.

ADAPTIVEFLEX CLOSURE SYSTEM

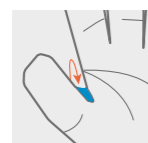

A two-layer construction consisting of a first elastic bandage around the wrist and a second layer resulting from an extension of the neoprene backhand all the way to the opening. To provide flexibility, the neoprene is strategically cut on the back and the front of the wrist. This system stabilizes and supports the wrist while enhancing freedom of movement.

THUMB FLEX

A cut in the palm latex between thumb and index finger optimizes the flexibility of the thumb and the ergonomic shape of the glove.

3D THUMB CROTCH

This rolled crotch construction between thumb and index finger avoids bothering seams and supports an ergonomic fit.

SIDE WRAP

A slightly wrapped construction of the palm latex on the outer side of the hand provides a snug fit and a bigger catching area.

THUMB WRAP

The palm latex wraps around the thumb to enlarge the grip area and create an ergonomic shape.

PULL LOOP

A slim textile loop on the inner side of the cuff ensures an easy entry into the glove.

REMOVABLE FINGER SUPPORT

This finger protection system with five individually removable protection spines reduces the risk of hyperextension while keeping the glove soft and flexible. A stretchable opening on the backhand of the glove allows a quick and individual removal of each spine.

ORTHO-TEC

Based on five individually removable, lightweight and highly bendable protection spines, the Reusch exclusive Ortho-Tec™ system adapts to the natural movements of the fingers and blocks them before being pushed backwards into the injury zone.

By applying a special adhesive print on the palm latex, tackiness and grip get enhanced exactly in those areas where they are needed the most. The positioning of the ink follows a precise pattern that is designed to cover exactly those areas of the palm that get in most contact with the ball when catching.

APPAREL

KEEPING THE COMFORT & STYLE FACTOR HIGH

Characterized by intelligent protection elements, modern fits and durable materials, the high-quality Reusch Goalkeeper Apparel Line is perfectly suited for all training and match situations. A revised range of functional goalkeeper underwear offers must-have padded apparel pieces and highly functional unpadded first layers.

100% RECYCLED POLYESTER

As one of the leaders in the goalkeeping industry, we are committed to reducing our environmental impact by using recycled polyester to produce our baselayers' collection. Recycled polyester is a more sustainable option rather than regular polyester since its production requires fewer resources and therefore generates fewer CO2 emissions. The products made of recycled polyester are marked with the icon above.

MATERIAL Rubber
SIZES 43 x 63 mm

3333
bright red / future blue / black

51 62 800
Reusch Glove-Wash

FEATURES Glove wash 2009/34/EC compliant Labeling according to Regulation (EC) No 1272/2008
MATERIAL 5 - 15 % nonionic tenside, < 5 % soap, Anionic tenside, Alpha-isomethyl ionone, Geraniol, Scents, 2 - (4-tert-butylphenyl) propionaldehyde, Pyrithione, Sodium, Benzisothiazolinone
SIZES 200ml foaming spray flask

universal

53 62 800
Reusch Neck Warmer

FEATURES Warm Fleece Material, Drawstring Closure with Cord Lock
MATERIAL 100% Polyester
SIZES UNIVERSAL

7700
black

62 80 006
Reusch Dario Beanie

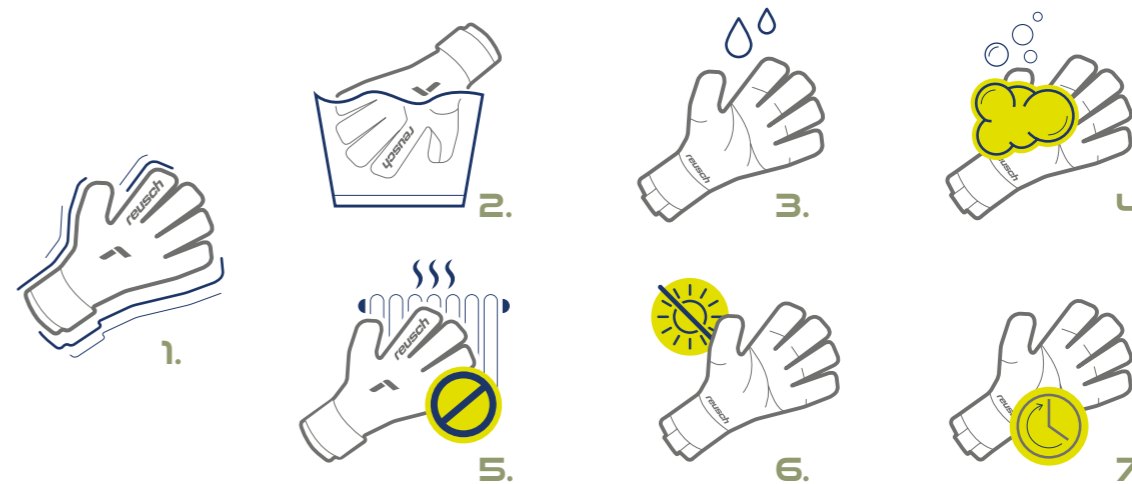

FEATURES Technical Beanie
MATERIAL 80% Polyamide, 20% Elastane
SIZES 56 & 58 & 60

7700
black

7 STEPS.
TO TREAT GOALKEEPER GLOVES RIGHT:

As highly technological and delicate products, goalkeeper gloves deserve and need special attention. Following some basic rules when choosing, playing, cleaning and storing the gloves will help maximizing their performance and durability.

1. CHOOSE THE RIGHT GLOVES FOR YOUR NEEDS

- Take the gloves that are made for the type of surface you regularly play on and the weather conditions you will face the most.
- Select the palm foam that best corresponds to your needs. Even though all Reusch palms are made of high-quality materials, they differ in terms of grip, cushioning and durability, depending on the material composition of the foam.
- Check the additional features of the glove that can help you improving your performance.
- Decide whether you want finger protection or not.
- Choose your preferred cut.
- Pick the right size.

2. WASH BEFORE FIRST USE

- Never forget about this! In order to eliminate any remaining soap necessarily used in the production process, the gloves must be cleaned with warm water before first using them.
- Only after this procedure the gloves attain their fullest grip properties.

3. MOISTEN BEFORE PLAYING

- Rinse Aqua gloves with warm water (preferably between 35-40°C) one to two hours before using them, in order to activate the Hydrograins™ inside the palm foam.
- Moisten all types of goalkeeper gloves before playing.
- Keep the gloves in slightly wet condition during use.

4. CLEAN AFTER PLAYING

- Wash the gloves with warm water (around 35°C) after playing in order to eliminate dirt that decreases the grip properties of the gloves.
- Do not use aggressive solvents or harsh cleaners.
- Wash by hand and not in the washing machine.
- For a perfectly clean glove, additionally use special glove wash.

5. DRY AT ROOM TEMPERATURE

- Let the gloves dry at room temperature.
- Keep away from radiators or other sources of direct heat, which would deteriorate the latex.

6. STORE IN APPROPRIATE LOCATION

- Do not expose gloves to UV radiation like intense sun light or light from fluorescent tubes, as this can impair the grip and durability of the latex layer.
- Store the gloves in a cool, dark and dry place.
- Goalie bags are the perfect storage items for your gloves.

7. USE UNTIL COMPLETELY WORN-OUT

- Very soft palm foams can show first signs of usage already after a small period of use.
- The performance and the grip properties of the glove remain untouched until the palm is totally worn out.

SPECIALIZED STICKER

Dimensions: 11,6 x 15cm
